are hereby abrogated. Special dispatch to the Chicago Evening Journal. Charksville, Tenn., Feb. 22. Generals Grant and McClernand, with aids, Col. W. H. L. Wallace and Lieutenunt Colonel Ransoin, and a detail of one company from the 20th and one from the 11th Illinois regiments, left Fort Douclson yesterday morning for Clarksville, on the steamer B. On the way up we met the tug-boat Conestoga, having on board Flag Officer. A. II. Foote and Col. Webster. The gunbouts went up to Clarksville day hefore yesterday, arriving there the same evening. The military had left in the di-rection of Nashville. The greatest consternation prevailed among the cilizens. Many had removed, and considerable quantities of property were destroyed by the citizens, lest it should fall into our hands. Col. Johnson, the mayor of the city, came on board the flag ship. He stated to Flag Officer Footo, that they desired protection. and peace. Flag Officer Foote assured him that it would be granted, to preserve the property of those who were loyal, At

fuced an evident feeling of security confidence. The gunboats destroyed the Cumberland iron works of Wood, Lewis & Co., John Bell owning one third of them. They were about midway between Dover and Clarks. ville, and had been used in the manufacture of plates for rehel cumboats. They would ask for our Letter A machines, the special ture of plates for rebel gunbonts. They

cost \$80.000. At 4 o'clock the steamer reached this place.' The party landed at once, and under escort of the detachment of infantry, paraded through the principal streets, with the national flag flying, to the tuno of "Yankee Doodle." After a short march the procession halted in front of Moore's Hotel, and were received in an informal manner by Hon. C. Johnson, Everything passed off pleasantly, and with evident good effect.

Everything quiet at Fort Donelson. The rebels, before evacuating Clarks ville, fired the railroad bridge crossing the Cumberland at that point. Com. Foote has issued the following

proclamation: To the Inhabitants of Clarksville: At the suggestion of Hon. C. Johnson, Judge! Wisdom and the Mayor of the city, who called upon me yesterday, after our hoisting the Union flag on the forts, to as certain my views and intentions towards the citizens and private property, I herebyannounce to all peaceably disposed persons that neither in their persons nor property shall 'they suffer molestation by ine or by the mand force under my command, and they may safely resume their business aveeations with the assurance of my protection:

CLARKSVILLE, Tenn., Feb. 22.

Generals Grant and McClernand, with aids, Col. W. H. L. Wallace and Lieutenant Colonel Ransom, and a detail of one company from the 20th and one from the Ith Illinois regiments, left Fort Donelson yesterday morning for Clarksville, on the steamer B. On the way up we met the tug-boat Conestoga, having on board Flag Officer A. H. Foote and Col. Webster.— The gunboats went up to Clarksville day before yesterday, arriving there the same evening. The military had left in the direction of Nashville. The greatest consternation prevailed among the citizens. Many had removed, and considerable quantities of property were destroyed by the cirizens, lest it should fall into our hands. Col. Johnson, the mayor of the city, came on board the flag ship. He stated to Flag Officer Foote that they desired protection and peace. Flag Officer Foote assured bim that it would be granted, to preserve the property of those who were loval. At the request of Colonel Johnson he issued a short proclamation to that effect. proclamation was immediately printed and distributed through the city. It was read with great delight by the citizens, and pro-duced an evident feeling of security and

the navat force under my command, and they may safely resume their business avecations with the assurance of my protection. At the same time I require all military tores and army equipments shall be aur rendered, no part of them being withheld or destroyed, and further that no secession lag or manifestation of secession feeling shall be exhibited, and for the faithful ohervance of these conditions I shall hold

the authorities of the city responsible. [Signed] ANDREW H. FOUTE.

in Carriage Trimming, Boot and Shoe Making, Harness Making, etc., etc. They are of extra size, with an arm long enough to take under it and strich the largest sized dushes. Here is scarcely any part of a Trimmer's stitching that cannot be better done with them than by hand; so, too, the saving of time and labor is very great. The table under these machines is 24 inchestions, and the shoutle will held six times the usual quantity of thread. The large machines, work as fast as small ones.

We would ask for our Letter A machines, this special attention of Vest Makers and Dress Makers, and all those who want machines for light Mannfecturing purposes. They embody the principles of the standard machines, mixing like them, the interlock stitch, and are destined to be as celebrated for Family Sowing and light mannfecturing purposes as our standard machines are for manufacturing purposes in gendral.

We have made the above Reduction in Prices with the two fold view of benef, ting the public and corseives. The public have been swintled by spenious machines made in limitation of ours. The intest in them, from the iron easing to the smallest piece, is of poor quality. Their makers have not the menus to do their work-well. They are hid away in secret pinces, where it would be impossible to have at their command the proper mechanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be ulade at inoticrate prices. The best designed machines, Ladiv Made, are always lable to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualifies to be looked for the machine are: certainty of correct action at all rates of speed, simplicity of construction, great durability and republity of operation, with the texts tabor! Machines to combine these essential qualities, must be made of the best metal and frighted to proclasers of machines, whose daily bread it may concern, will find that those having the above qualities for only work well at reput as well as slow rates of speed, but hast long in the thest possible working order. Our machines, as made by us, will earn more money with less later than any others, whether intimitation of ours or not. In fact, they, are cheaper than any other machines as a gift.

Washington's birthday was chosen for the nomination to the senate of General Winfield Scott as minister extraordinary to Mexico, with, it is said, functions such as he exercised in the pacification of the northeastern boundary. Accompanying this nomination, the project of a treaty went into the senate, whose principal feature was, substantially, the assumption of the Mexican debt, and the interest on this amount to three million dollars per year. Between Benecia and Sacramento on the 17th ult., the country was one vast sheet of water, varying from six inches to ten feet deep. The banks of the river were them. The sheep are all dead.

Relief boats were sent out in every direction, and large numbers of people had been brought to San Francisco, the women and children half dressed, all suffering severely. People were found in trees who had had nothing to eat for two days. All over the plains are to be found mounds built by the Indians, and on these elevations were guthered families and cattle waiting for relief. Most pitiful stories are told of the suffering endured by all classes of people. And yet, tho rains were not over, and the spring floods, occasioned by the melting of the snows in the mountains, are yet to come. This is a hard winter for California.

The Washington correspondent of the Philadelphia Inquirer says that several prominent Virginia politicians, who were conspicuous at the beginning of the rebellion, but were unsuccessful in obtaining office under Davis, have now secretly applied to see on what terms they can return to their allegiance at Washington.

It is hardly up to Secre tary Stanton's style of talking to them .--"The purpose of this war," says the secretary of war, "is to attack, pursus and destroy the rebellious enemy, and to deliver the country from the danger menaced by traitors."

In none of Stanton's general orders does he lecture the soldiers about stealing slaves, by Glover and are now in the war departor inform "our fellow citizens" of the rebel states that he will give them peace and protection, of life and property, as in former days; nor does he apotogise in advance for forced contributions, telling them that it will be "as light as possible, and be so distributed as to produce no distress among the people" of those rebellious states. The Treasury Note Bill.

Congress is very slow in disposing of the treasury note bill. There is a disagreement between the two houses on an amendment, and a committee of conference was appointed on Friday, but up to yesterday they had had no meeting.

The obstacles in the way of prompt action are the efforts of bankers and capitalists to modify the original bill to suit themegelves. There are several things which

they wanted that they did not get; for instance the house rejected the senate amendment reducing the \$150,000,000 to \$100,-000,000; that including the notes of July in the provisions of the bill; that making the bonds redoemable after five years : that authorizing the exchange of the demand notes for 7 3.10 bonds; and that setting apart the proceeds of certain property for the payment of interest and the redemption of principal. But the eastern capitalists obtained a provision for paying the interest in coin, and an amendment authorizing the secretary of the treasury to dispose of sufficient bonds at any time, and at any shave, for coin or treasury notes. The amendment authorizing the secretary of the treasury to receive notes on deposit and issue certificates therefor, at not less than thirty days, was adopted.

Mr. Stevens offered an amondment to tried on the spot, and, if found guilty, the pay soldiers, sailors, and those furnishing sentence of death may be executed ou the them with food and clothing, in coin, as it them with food and clothing, in coin, as it manding general at the head of his regi-was proposed to pay bankers and brokers meut. The former course is recommended for interest on the government bonds they as the preferable one. Cowardice in an held. This was carried, but a sufficient officer, displayed upon the field of battle, held. This was carried, but a sufficient number of accommodating members changed their votes to reverse the decision. If capitalists are to receive coin for the use of their money, why not the soldier who exposes his life to defend the broker's property? The truth is, all public demands should be treated alike, and paid in the same way. The yeas and nays were ordered, and will be published.

The London Times says the American people in the last six months have contrived to spend more money in shorter time and to less purpose than any other people on the face of the globe, and that it is literally all that has been done; and argues that the subjugation of the south and future re-union have become impossible.

We think the British government recently spent a good deal of money for little purpose, when it cost them \$12,000,000 to get Slidell and Mason released, "Two fellows" who are not worth the powder to blow them up.

The London Times is forgetful, as usual, of the past history of England. She expended four thousand millions of dollars to tight Napoleon, and what was gained?-The expenditures of England, from 1806 to 1814, amounted to four hundred millions of dollars per annum, and yet when her wars were ended she had gained nothing but the hatred of the world. See "Porter's Progress of the Nation."

Let us not be alarmed by the croakings tion of victory and military combination to end this war, was declared in a few words of English scribblers. We have more material wealth, to-day, than England had in Buckner—'I propose to move immediately 1805. Upon this we can base our issue of on your works!' Yours, truly, treasury notes for a year or two, without fear, if England could depend upon irre deemable exchequer bills and bank of Eugland notes, for twenty-five years. Nothing from Columbus or Nashville.

Our afternoon dispatches bring no further intelligence from Columbus or Nashville. We do not regard as reliable the rumor of the fall of Nashville, coming from Richmond, as it originated with the rebels, and may be intended to deceive.

CAPTURE OF A FULL BLOOD .- During sland some laughable incidents occurred although it was a time filly calculated to ndalge in levity. As we were tradging along in company with a party of skirmishers belonging to a Massachusetts regiment, who were searching for any stragglers of the retreating foe who might be skulking in out-of-the-way places, several of them suddenly sprung out from some bushes near by, two of them getting into the woods and another running across an open space, making leaps that would have done credit to Gildersleeve, Jackson, or the American Deer."

Capt. Bradford called out for him to stop, several times, but finding we were likely to lose sight of him, ordered the men to fire. The frightened rebel heard the order, and quick as possible turned around and putting up both hands called out, "Please don't shoot! please don't shoot. der having been countermanded, the man and surrendered himself. He was clothed in a civilian's drass, and professed to be quartermaster of one of the North Carolina regiments.

Not long after this, fifteen or twenty of the prisoners were drawn up around a good fire, and my friend, the artist, thought it was a good opportunity of taking a sketch of them. Perceiving what was going on the rebel 'quartermaster, who had by this time recovered from his fright, said : expect you're some Yandee newspaper man, and I want you to remember that, though I ain't so good looking as some o' weather is favorable the line will be open the rest in this crowd, I've got jest the best and o' southern blood in my veius.

> An Alabama volunteer writes from one of the rebel camps:

"There's a new disease broken out here -the 'camp disease,' they call it. The first symptom is a horror of gunpowder. The patient can't abide the smell of it, but is seized with a nervous trembling of the knees, and a whiteness about the liver, and longing inclination to advance backward. That's the way water serves mad dogs. Then comes what our major calls home fever: and next the sufferer's wife and nine childen are taken sick; after which the poor fellow takes a collapse, and then a relapse. But its mighty hard to get a discharge, or even a furlough—awful hard. Fact is, you can't do it without working the thing pretty

We hear can-non booming down there by the hour, and they say the Yankees are going to play the very devil with our ducks. I think I can detect a faint smell of powder in the breeze, and feel a strange desire to go into some hole or other. It may be the climate; hope so, but don't see how that should make me turn so cold about the haversack every time I should see a bayonet. If I only had some good spirits, now, to take every morning, I think I should stand it very well. Please send me some immediately on receipt of this. (N. ESCAPE OF A PRISONER.—The Jefferson Republican gives the particulars of the escape of George Holmes, who was under in dictment for forgery, from the jail in that county. Last Saturday night he got into the cell with one Bridget Carey, where he remained until morning. Bridget has been accustomed to belying in the kitchen mornings, and on Sunday morning about six o'clock, ga the turnkey was releasing the prisoners from their cells, the woman went out, as was supposed, to attend to her du-

ties. Shortly after it was discovered that

Bridget had not been out, and that Holmes

was the woman who had worn off Bridget's

clothes. So she was waiting for Mr. man

to come back, in order to make her toilet.

Diligent search was made for a day or two

for the culprit but he had made good his MEATLY EXECUTED AT WIS OFFICE

Home Manufactures Successful. After encountering many difficulties, submitting

many unavoidable delays and expenses (always incl dent to beginners) we have overcome all obstacles and succeeded in producing an article which we are not ashamed to own as one of home manufacture. Many have the impression that an article is better 'hecause it is made in Ohio, and which has to be paid for in Ohio Of all such we, we would ask an examination of the Jessup Grain Drill made in this city. Without claiming for it any superiority in workmanship over foreign onde, we are willing and anxious to have an examina tion of its qualities and peculiarities. We have been for the last week testing one of the drills, and we are more than satisfied with the accuracy with which it distributes the grain. It is safe to assert as a fact, that it is perfectly acurate in the distribution of grain, whether it is wheat, rye, oats, barley, carn, peas or cans, or any grain grown in this climate. The teeth are set double rank, and it can be used as a broadcast ower, with as much satisfaction as any machine yet introduced in this market.

The advantages of a home made machine should be apparent to every one. Should repairs need to be made, or improvements attached, it can be done much more readily where made than elsewhere. This county has said thousands of dollars every year since its organization to the eastern states for agricultural implements. This should not be. Yet these implements are indispensably necessary. No farmer is able to do business without them. What could a farmer do without a plow? Why not make our own plows? What could s former do without a waggon? Why should we not make every waggen in use here? No farmer should do without a grain drill. Why pay tribute to Ghie or New York for everything we use? The Jessup Grain Drill, made by R. J. Richardson, are now on exhibition at the Rock River works, on the Triangle and at Richrdson's hardware store. Please go and see them, but den't buy one, nor encourage their manufacture unless y is think they are worthy of your natropage. THE MANUFACTURER. 1a25 law 24

W E have now completed our new addition, making our store decidedly the largest business establishment west of New York city; size, 44 feet by 180, five stories high including basement. And in order to fill the same, we found it necessary in the early part of the season, to purchase ten times our usual amount of stock. We have now in stock at our different seateweeks. We have now in stock, at our different establishments, over
